

The M1.48-104 T100.23 is a 4-digit display for the temperature measurement by means of a Pt100 sensor and a visual monitoring of the limit value via the display. The display is configurable via 3 front keys or by means of optional PC software PM-TOOL. Selectable software functions, a direct limit value adjustment in the operating mode and the small installation depth of only 54 mm form a solid device concept.
