

The 4-digit mains-independent display M1.72-144 CL is designed for the connection of a current loop 4-20 mA and for visual limit value monitoring via the display. The configuration is done via 3 front keys or by means of optional PC software. Optionally, 2 additional switch points (normally open) are available. Selectable software functions, a direct limit value adjustment in the operating mode and the low installation depth of only 38 mm distinguish this device.

Technical data	
Power supply	240AC, 230AC, 24DC, -, 10-30DC, 40DC
Measuring input	4 - 20mA Current loop
Number of digits	4
Digit height	14 mm
Width × height	72 x 36 mm

Variants (2)
