

Potentiometer

M1.96-144 VR

The M1.96-144 VR is a 4-digit display for length/level measurement via potentiometer >1 kOhm to <1000 kOhm and visual limit value monitoring via the display. The display is configurable via 3 front keys or by means of optional PC software. Selectable software functions, a direct limit value adjustment in the operating mode and the small installation depth of only 38 mm form a solid device concept.
