

The 5-digit display unit M2.96-145 AC4EL is used for measuring AC voltage/AC current signals TRMS and for visual limit value monitoring via the display. The configuration is done via four front keys or by means of an optional PC software. Options such as an analog output, a digital input and two setpoints are available to the user for further evaluation. Selectable software functions, a direct limit value adjustment in operating mode and the compact installation depth of 89 mm form a solid device concept.
