

The M2.96-145 AC4L is a 5-digit indicator for measuring high AC voltage signals TRMS up to 600 VAC and a visual limit value monitoring via the display. The configuration is done via 4 front keys or by means of our optional PC software PM-TOOL. For further evaluations, the user has options such as an analog output, a_x000D_digital input and two setpoints. Selectable software functions, a direct limit value adjustment in operating mode and the compact installation depth of 89 mm form a solid device concept.
