

The M2.96-145 DC4 is a 5-digit display for measuring high DC voltage signals up to 600 VDC and visual limit monitoring via the display. Configuration is done via 4 front panel push buttons or by using the optional PC software PM-TOOL. Options such as an analog output, a digital input and 2 setpoints are available for further evaluation. Selectable software functions, a direct limit value adjustment in the operating mode and the compact installation depth of 89 mm form a solid device concept.
