

The M2.96-145 F is a 5-digit display for measuring pulses by means of incremental encoders, NPN/PNP or Namur sensors and a visual limit value monitoring via the display. The configuration is done via 4 front keys or by means of an optional PC software. Optionally available are an analog output, a digital input, a pulse output and 2 setpoints. Selectable software functions, a direct limit value adjustment in operating mode and the compact installation depth of 89 mm form a solid device concept.
