

The M2.96-145 TD is a 5-digit display for measuring DC voltage/DC current signals and visual limit value monitoring via the display. This display is configurable via 4 front keys or by means of PM-TOOL, the_x000D_optional PC software. For further evaluations_x000D_options like an analog output, a digital input, a sensor supply and 2 setpoints are available. Selectable software functions, a direct limit value adjustment in operating mode and the compact installation depth of 89 mm form a solid device concept.
