

The M3.96-145 AC4EL is a 5-digit display unit for measuring AC voltage/AC current signals TRMS and visual limit value monitoring via the display. Configuration is done via four front panel push buttons or by means of optional PC software. Two analog outputs, RS232/RS485 interfaces, a digital input and up to 8 setpoints are optionally available. Selectable software functions as well as a direct limit value adjustment in the operating mode complete the modern device concept.
