

The M3.96-145 TD is a 5-digit display for measuring DC voltage/DC current signals and visual limit value monitoring via the display. Configurable via 4 front keys or by means of optional PC software. Two analog outputs, RS232/RS485 interfaces, a sensor supply, a digital input and up to 8 setpoints are optionally available. Selectable software functions and a direct limit value adjustment in the operating mode complete the modern device concept.
