

The M3.96.2-145 R100k3 is a 4-digit display for length/level measurement by means of resistors up to 100 kOhm and for visual limit value monitoring via the display._x000D_
The configuration is done via three front keys or by means of an optional PC software. Optionally, two analog outputs, the RS232/RS485 interfaces, a digital input and also 2 setpoints are available. Selectable software functions, a direct limit value adjustment in operating mode and the compact installation depth of 74 mm form an extremely solid device concept.
