

The M3.96.2-145 T100.34 is a 5-digit display for_x000D_temperature measurement by means of a Pt100 sensor and a visual monitoring of the limit value via the display. The display is configurable via three front keys or by means of an optional PC software. Optionally, the two interfaces RS232/RS485, an analog output and two setpoints are available. Selectable software functions and a direct limit value adjustment in operating mode round off the device concept.
