PAQ ammeter (DC, 240° scale)
Analogue display device with moving-coil measuring mechanism for direct current measurement, designed with a large 240° PAQ scale for exact readings. The measuring device impresses with its low power consumption, precise display and robust design.

Features:

- For DC current measurement
- Class 1.5
- 240° scale (PAQ)
- Overload-resistant: 1.2 × IN continuous, 10 × IN (5 s)

Variants (423)
